**Subject:** Public comments

All,

As you may be aware, we have received a large number of emails regarding the Kampachi Permit over the weekend. At the time I'm sending this we are sitting at 6,489, with more coming in (the public comment period ended yesterday). The vast majority of the emails we received were form emails and, since they all have the same email title, I'm not able to save each one individually in the Public Comments folder. The title of all those emails is "Don't build an aquaculture facility off the Gulf of Mexico". I've included one copy as a reference.

I'm still working on getting all the unique emails saved in the Public Comments folder. Within the Public Comments folder I also created a subfolder called PDFComments. This folder contains the attachments sent by various groups and contain more substantial comments. That's not to say the individual emails may not contain substation comments as well, I just haven't had a chance to really go through them yet.

I'll look to schedule a meeting some time on Wednesday so we can plan our next steps.

Thanks,

Meghan
